

Technology	Primary Benefit
A. Artificial Intelligence (AI)	1. Automates repetitive, rule-based tasks to improve efficiency and reduce errors.
B. Data Analytics	2. Supports real-time decision-making through trend analysis and forecasting.
C. Robotic Process Automation (RPA)	3. Enhances productivity by reducing manual operations like data entry and reporting.
D. Cloud Computing	4. Enables scalable, secure, and on-demand access to financial services and storage.
